***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 12/12/2005 has been entered.

**REASONS FOR ALLOWANCE**

2. The following is an examiner's statement of reasons for allowance:

The invention as claimed. Claims 1, 23, and 46 specially include limitations based on monitoring and periodically collect data about a plurality of computer within a peer-to-peer network, and forming a profile characterizing each of the plurality of computers based on the collected data, wherein the profile comprising at least information on a number of files contained within each of the plurality of computers and other characteristics of each of the plurality of computers (as defined in the specification of the instant application at page 11 lines 11-12 and page 15 line14-page 16 line 3). While system and method for monitoring and periodically collect data about a plurality of computer is firmly documented by cited prior art, the monitoring and periodically collect data about a plurality of computer within a peer-to-peer network, and forming a profile characterizing each of the plurality of computers based on the collected data, wherein the profile comprising at least information on a number of files contained within each of

the plurality of computers and other characteristics of each of the plurality of computers (as defined in the specification of the instant application at page 11 lines 11-12 and page 15 line 14-page 16 line 3) limitations are novel, and the invention is patentable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### EXAMINER'S AMENDMENT

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

The title of the invention is changed to **"System and Method for Searching Peer-to-Peer Computer Networks by Selecting a Computer Based on at least a Number of Files Shared by the Computer"**.

The claim of the invention is amended as follow

1. (Currently amended) A method for searching a peer-to-peer computer network, comprising:

Art Unit: 2155

monitoring and periodically collecting data about a plurality of computers within the peer-to-peer network, the collecting including a network location of each of the plurality of computers and being independent of a user search query, the collecting further including,

sending a signal to at least one of the plurality computers;

receiving the signal upon its return from the at ~~least~~ least one computer;

and

forming a profile characterizing the at least one computer based on information provided by the signal, the profile comprising information on a number of files contained within the at least one computer and one or more of:

a round trip time measure taken by the signal during its travel to and from the at least one computer;

information on an amount of content available to the network on the at least one computer;

information on the at least one computer's capability to process a search query;

information on a number of connected computers encountered by the signal during its travel to and from the at least one computer;

information on a number of additional computers connected to the at least one computer

information on a frequency with which the plurality of computers are connected to the network; and

information on which of the plurality of computers are currently connected to the network;

selecting at least one computer to be a selected computer, based on the collected data; and

routing a search query from a user to the selected computer via the network location of the selected computer.
